

ELECTROPHORESIS READER

 **MICROPHOR08**

Pocket Electrophoresis Densitometer

- Ready for transparent/opaque scanning
- Fast and reliable
- Suitable for agarose gel and cellulose acetate

ELECTROPHORESIS READER

Smart and reliable

Technical features

- LED light source and high gain phototransistors
- Reading system in absorbance with self-regulation of the source bright
- Reading media in cellulose acetate (transparent and opaque)
- Reading media in agarose gel
- 8 Reading samples at a time
- Connection to pc via USB
- External power supply 24v
- Dimension: 11.6x15.6x6.3 cm (LxPxH)

Software features

- Pre-programmed Analysis: Serum proteins, Hemoglobins, Lipoproteins
 - Possibility to define additional exams
- Automatic Processing of electrophoretic pattern
 - Possibility of correction of paths
- Personal management and printing reports
 - Report header customization

Operating system :

MICROPHOR08
